Human Interest in New Technology (HINT) was established in 1992 as a consulting company for the Oil Gas & Chemical Industry. Hint transitioned into software development, Cyber Security and Front End Engineering & Design and in 1997 developing their first open web-based software platform for Process Analyzers, Custody Transfer flow measurements, Loading Control applications called AML.

The AML– Information Management is now transformed into a real-time asset management system for all kinds of equipment. Hint has executed system integration projects like SCADA, Analyzer management, flow measurements, Continuous Emissions Monitoring Systems, and Fire & Gas systems. Hint’s team of experts deploy digital transformation solutions focused on Measurement & Allocation, Operational Excellence, Asset Integrity & Maintenance, and Data Management to improve the efficiency with there clients

CORE COMPETENCIES:

- Bias Independent Consulting
- Software development and digitalization
- System integration and project execution

DIFFERENTIATORS:

Hint provides companies & agencies efficient sustainable solutions maximizing our experience in consulting and software design focusing on real-time asset management improving quality, and the reliability of process analyzers.

AML is a proprietary (cloud) web-based software toolbox for client preferred users that allow them to configure, monitor, operate, and maintain on-line equipment remotely, in a cost effective simpler streamlined manner.

Hint services & solutions are focused on measurement, operation, asset integrity, and maintenance information needed to improve life cycle management.

OUR APPROACH:

Build upon previous accomplishments with a clear understanding that we must continue listening to customers and fulfilling their expectations of value and service.
